SENIOR FINANCIAL ANALYST | FP&A | STRATEGIC FINANCE | BUSINESS PARTNERING

Arizona, USA | +1(480) 840- 7352 | neha.m.bandekar@gmail.com | [LinkedIn](#)

PORTFOLIO: nehabandekar.com | 7 Selected Case Studies spanning FP&A Infrastructure, BvA & Business Partnering, Executive Reporting, Financial Data Integrity, AI-Assisted Finance, Banking & Public-Sector Finance

PROFESSIONAL SUMMARY

Senior FP&A professional with 7+ years of finance experience spanning high-growth operating finance, U.S. public-sector accounting, and regulated banking. Experienced in budgeting and forecasting, departmental BvA, driver-based planning, scenario modeling, profitability analysis, executive reporting, and finance business partnering across complex multi-business-unit environments. Combines financial analysis with strong data-integrity discipline, tracing reporting issues across ERP/GL, master-data, and warehouse sources before results reach leadership. Brings additional depth in banking portfolio analysis, liquidity management, credit and lending, financial controls, reconciliations, and finance automation.

CORE EXPERTISE

Financial Data & Analytics: Cross-System Reconciliation, ERP/GL Data Analysis, Master Data Management (MDM), Data Warehouse & Lakehouse Reporting, SQL Against Governed Views, Data Mapping, Data Validation, Reporting Controls, Root-Cause Analysis, Regression Testing, Financial Data Integrity, KPI Logic & Reporting Architecture

Systems, BI & Automation: Advanced Excel, Power Query, Power BI, NetSuite, Oracle-Based Core Banking ERP, Microsoft Fabric, Azure Data Environment, Profisee MDM, Google Sheets, Google Apps Script, SQL, Workflow Automation, Reporting Automation, AI-Assisted FP&A, Automated Variance Analysis, Human-in-the-Loop Validation

PROFESSIONAL EXPERIENCE

CARDONE VENTURES | SENIOR FINANCIAL ANALYST, FP&A

Sep 2025 - Present | Arizona, USA

- Own FP&A reporting and financial performance analysis across a multi-business-unit organization supporting 15+ departments, including departmental BvA, forecasting, KPI reporting, executive commentary, and finance data-integrity controls.
- Run the monthly BvA cycle end to end across five departments, reconciling 100K+ ERP/GL and operational records, analyzing revenue and operating-expense drivers, and partnering with department leaders to translate variances into clear results, drivers, timing, risks, and recommended actions; identified and corrected a ~\$50K reporting omission by tracing a product-classification defect to its upstream source.
- Built the FP&A infrastructure for a new consulting division, including a 5-year monthly driver-based P&L with base, upside, and downside scenarios linking pipeline conversion, capacity, headcount, COGS, operating expenses, gross margin, and operating income.
- Developed finance requirements for pipeline reporting and co-developed contract-based revenue schedules with accounting, separating commercial forecasting from accounting recognition and aligning recognized revenue with signed contracts, applicable performance obligations, and company revenue-recognition policy.
- Own accuracy review and executive commentary for consolidated multi-entity reporting across P&L, balance sheet, cash flow, EBITDA, MD&A, and variance reporting, applying separate mathematical and narrative quality-control gates; intercepted material sign-logic and unexplained-movement issues, including a ~\$2.4M balance-sheet movement before executive delivery.

- Led finance-side reporting integrity through master-data and warehouse migrations, owning root-cause diagnosis, source-logic redesign, finance query requirements, validation, and regression testing while partnering with Platform/BI teams on governed data views and dashboard delivery.
- Built reusable AI-assisted and automated FP&A workflows across variance analysis, BvA, MD&A, balance-sheet review, and data preparation, reducing manual preparation effort by ~40% while maintaining source reconciliation, documented controls, and required human approval.

U.S. PUBLIC-SECTOR ACCOUNTING | CONTRACT ASSIGNMENTS

County of San Mateo | Fiscal Office Specialist - AP Division

Mar 2025 - Jun 2025

Housing Authority of the County of Alameda | AP / AR Specialist & Payroll

Jul 2025 - Aug 2025

- Supported U.S. public-sector accounting across AP, AR, payroll, month-end close, reconciliations, and financial controls, including a high-volume AP operation processing 1,000+ invoices monthly while maintaining documented approvals and audit-ready support.
- Managed AP workflows and exception handling across invoices, purchase orders, coding, vendor documentation, and payment activity, standardizing approval processes and improving processing efficiency by 35% while preserving financial controls.
- Performed bank, subledger, and GL reconciliations, journal-entry and close support, accrual-related review, and financial-data validation, contributing to a 3-day reduction in month-end close-cycle timelines.
- Analyzed AR aging and coordinated cross-functional issue resolution, accelerating collections by 18%, while supporting payroll validation and resolution of accounting and transaction exceptions.

CANARA BANK | FINANCE MANAGER

Apr 2021 - Aug 2023 | India

- Oversaw financial performance, daily cashflow, and liquidity monitoring for a \$40M+ banking portfolio, tracking lending and deposit activity, profitability, credit exposure, and portfolio trends while improving control accuracy by 30% through structured monitoring processes.
- Led annual budgeting, rolling forecasts, variance analysis, and management reporting across operational departments, improving forecast accuracy by 15% and translating financial and operating drivers into actionable insights for regional leadership.
- Monitored lending, deposits, interest-income drivers, liquidity requirements, credit exposure, and portfolio performance to support profitability, resource-allocation, and risk-management decisions.
- Evaluated lending and credit exposures through financial analysis, loan and credit documentation review, transaction monitoring, repayment and policy considerations, and coordination with credit, risk, treasury, operations, and branch leadership.
- Strengthened financial controls through account reconciliations, transaction and exception reviews, and cash, asset, and liability monitoring while supporting internal and external audits and regulatory requirements.

CANARA BANK | FINANCIAL ANALYST

Aug 2017 - Apr 2021 | India

- Analyzed financial and operating performance across a 350+ branch network using centralized Oracle-based core banking reports, evaluating revenue, expenses, deposits, lending activity, interest income, and profitability trends; data-driven recommendations improved operational efficiency by 25%.
- Prepared recurring financial and management reporting, investigating branch and product performance, material variances, portfolio movements, operating-cost drivers, and financial trends to support regional management reviews and resource decisions.
- Supported lending and branch operations through financial analysis, credit and loan documentation review, account and transaction validation, reconciliations, and coordination with credit, operations, risk, and branch teams.
- Conducted ROI and cost-benefit analysis for capital investments and business initiatives, evaluating expected returns alongside financial and operational risk and contributing to a 20% improvement in long-term investment efficiency.
